

Formats for Designs

Example of designs for 2-Color Screen Printing

Ultimately, the designs for both block printing and screen printing will need to be in a digital format.

Screen printing: we will use vinyls to block out our screens. They will be cut with a vinyl cutter or cricut cutter.

Block printing: the blocks will be cut with the laser cutter. You will need a DXF file for the laser cutter.

The design for your screen print must be within:

Adobe Illustrator is recommended as your design application. We will cover making the appropriate files in another class period.

The designs for your block prints:

For Blocks:
No bigger than 5" x 7"

For Rollers:
No wider than 6"
7.46" in length to go around
the 2" PVC tube.
